### Global Precedence in Attended and Nonattended Objects

Global Precedence in Attended and Nonattended Objects Lise Paquet and Philip M Merikle University of Waterloo, Waterloo, Ontario, Canada In four experiments we evaluated whether there is a priority in early perceptual analysis for the global aspect of a nonattended, visual, compound stimulus In all experiments, two objects were

## Grade 6 Math Circles - University of Waterloo

Objects that have much less mass than the Earth, such as my laptop, water bottle or even the hugest buildings, do not have enough mass for objects to actually be pulled towards them. Although, every object still attracts all other objects to it at least a little, just usually not enough for objects to actually move towards it. Page 6

## Reducing the Disk I/O of Web Proxy Server Caches

10 100 1K 10K 100K 1M Object Size (bytes) 0 20 40 60 80 100 Objects (%) Figure 1: The dynamic size distribution of cached objects. The graph shows a cumulative distribution weighted by the number of objects. For example, 74% of all object references have a size of equal or less than 8K Bytes. 22 File System Aspects of Web Proxy Server Cache

## Intermediate Math Circles October 9, 2019 Counting Part 1 ...

There are  $1 \cdot 10 \cdot 10 = 100$  ways to begin with a 1 and from the previous example, 90 ways to end with a 4 and 90 ways to end with a 6 so there are  $100 + 90 + 90 = 280$  ways. But we have a permutation of a set of distinct objects is an ordered arrangement of the objects. An ordered arrangement of  $r$  elements from a set of distinct objects is called

## approach coastal imagery using an image object detection ...

objects. Moreover, the dominant landscape objects have their intrinsic scales and are composed of structurally connected parts. In this article, the image object detection approach (IODA) (Chen, Pan, and Mao 2006, 2009) is adopted to choose appropriate scales and produce meaningful image objects from any possible image candidates, and to
